

**charge. fast. anywhere.**  
Your mobile charging unit

## **NRGkick by DiniTech GmbH is voted among the top 10 charging management partners.**

This year, for the first time, the Austrian trade magazines Firmenwagen and Traktuell launched a vote for the "Top Ten in Charging Management". Readers were able to freely name their preferred providers of charging solutions for electric cars. NRGkick was able to secure a place among the winners alongside some big names in the mobility industry. With its user-friendliness in application, the multitude of intelligent functions, as well as the sophisticated safety mechanisms, NRGkick convinces countless users every day anew. Charging an electric car is thus made as easy and flexible as possible. Even for newcomers to the field of electromobility, NRGkick is very easy to use without any prior knowledge - the mobile wallbox requires no installation and can be used for charging immediately. Smart features such as time-controlled charging or automatic charging reports can be used via the free app.

In addition to safety and user-friendliness, the regional manufacturer and employer focuses above all on quality. For the production of the charging unit, the company works almost exclusively with suppliers from Austria and Germany.

NRGkick from the company DiniTech GmbH is the only mobile charging solution in the ranking and shows that the in-house developed and produced products are helping to shape the electromobility market. Other winners of the vote are BP, OMV, Verbund AG, ÖAMTC, EnerCharge GmbH, EVN, Hectronic GmbH, KEBA Group and Smatrics.
